Sanitation & Pest Control Policy

Revised By:	MDaskis
Approved By:	NRoss
Reason for Revision:	New

OBJECTIVE:

The sanitation of the facility is critical as all other food safety parameters and actions rely on an effective and validated Sanitation and Pest Control Program.

SCOPE:

All Hub Users influence the efficacy of the Sanitation and Pest Control Program. The associated Standard Operating Procedures, Records, and Work Instructions provide guidance and verification that the policy requirements will be attained.

Additional references, signs, and forms are available to assist in understanding the value, the necessity, and the methods for achieving the goals of the Sanitation and Pest Control Policy.

The HUB Users and HUB Management must work together to develop a customized and effective sanitation program to ensure the safe operation of the facility.

PREVENTION IS A COST SAVING ACTION!

REVIEW:

This policy should be reviewed at least annually or as new regulatory requirements occur.
