

Food Hub Allergens and Recall Alerts Resources

Product Recalls, advisories, and safety alerts

The Product Recalls website below provides insights as to the current specific ingredients and products that are posing food safety risks. This information also provides details of the company, possibly a supplier, that has products that are on this list as well. This list will also identify the severity of the risk and the physical locations where the products or ingredients are distributed.

<https://www.canada.ca/en/services/health/food-recalls-alerts.html>

Highly recommended that you apply to obtain the Product Recalls Alerts to understand the dominant recalls being the presence of **undeclared allergens** in food products. The best means of communicating with your consumer is through the accuracy and completeness of information on your product label.

Food Allergen Declarations - Canada
